

Dear FCC,

I live in southwest Colorado and I would really like to have Colorado based Satellite coverage on my TV. I currently get New Mexico stations and I would like to have Denver stations. During Election years we down here do not even know who is running for office most of the time. It would be great if we could get the debates from the candidates from our own state. I know more about New Mexico politics than Colorado's and I have to vote in Colorado. I would like to just be informed about what is going on in my own state in the everyday news. If we could get Denver on the satellite dishes it would be GREAT.

Amylou Peterson
